1. Introduction

- 1.1 The Incident Management policy will govern the decisions and actions taken during Massar Solutions IT Infrastructure standard services failures that cause, or may cause, an interruption to, or a reduction in, the quality of that service.
- 1.2 Incident Management Policy will ensure a consistent and coordinated approach to restore normal service operation as quickly as possible and minimize adverse impact on business operations, ensuring that the agreed-upon availability is maintained for incidents.

2. Purpose

- 2.1 The purpose of this policy is to establish standards and best practices on how to respond effectively to all support incidents.

3. Scope

- 3.1 The scope of this policy applies to all incidents reported by Massar IT, to include vendors & third-party contract personnel (consultants/contractors) regarding IT Infrastructure hardware, software, system components, virtual components, cloud components, networks, services, documents, and processes.

4. Roles and Responsibilities

- 4.1 IT Manager is responsible for overall implementation, maintaining of this Policy document, and is to ensuring that the Policy is communicated to all Massar employees and adhered to.
- 4.2 The Incident Management process is the responsibility of all analysts in the IT Operations department, including vendors and third parties that support, manage and/or operate IT Infrastructure devices and services for Massar Solutions.
- 4.3 These management processes include a Service Desk Operator / Analyst, a process owner, and the process support staff.
- 4.4 Massar's Service Desk is the owner and driver of the Incident Management process, and the process participants support the activities and tasks of the process.
- 4.5 It is acceptable that the Service Desk Incident Manager or process owner and process participants may play other roles in the IT organization.
- 4.6 The following roles are identified as part of the Incident process:

4.6.1 Service Desk Operator

The Service Desk Operator oversees receiving and registering the Incidents per the corresponding Incident Management process. This role will also attempt to resolve the incident as the first line of support. The responsibilities of the role are to:
Receive and register Incidents submitted via Service Desk, telephone, and email.

- 4.6.1.1 Classify the Incident and act as the first line of support to resolve the ticket
- 4.6.1.2 Resolve and close the Incident (if possible)
- 4.6.1.3 Escalate the Incident to the second line of support or specific resolver queue for further resolution if required

4.6.2 Second-Line Support

The responsibilities of the second line of support technicians will be to:

- 4.6.2.1 Receive and further document Incident details
- 4.6.2.2 Investigates and diagnoses Incident
- 4.6.2.3 Identify potential problems and/or Changes required
- 4.6.2.4 Resolve and close Incidents

4.6.3 Third-Line Support

The responsibilities of the third line of support technicians will be to:

- 4.6.3.1 Refer to third-party or outsource support
- 4.6.3.2 Receive and further document ticket details
- 4.6.3.3 Investigate and diagnose Incident
- 4.6.3.4 Detect potential problems and/or Changes required
- 4.6.3.5 Resolve and close Incident

5. Communication of Policy

- 5.1 Effective communication of the policies contained in this document is essential for an efficient management and internal controls process and to the successful protection of Massar's Information Resources.
- 5.2 To facilitate this communication, a link to the repository of all IT policies will be added to the Massar document repository tool for easy access and reference by all employees and a notice of changes will be issued whenever modifications to these policies are updated and approved.
- 5.3 Circulation of this document and subsequent updates are controlled and monitored by the IT Manager in line with the Control of Document (MAS-QH-PR-001).

6. Incident Management Process

The Incident Management process shall include namely the following activities:

6.1 Incident Detection and Recording

- 6.1.1 This activity shall record basic details of the Incident, alerts the appropriate support staff, and start procedures for handling the request.

6.2 Classification and Initial Support

- 6.2.1 This activity shall classify the Incidents, matches the Incident against known errors and Problems, assign impact and urgency, assess configuration details, and provide initial support or close the Incident.

6.3 Investigation and Diagnosis

- 6.3.1 This activity shall involve:
 - 6.3.1.1 Assessing the Incident details.
 - 6.3.1.2 Collecting and analyzing all related information including workarounds.
 - 6.3.1.3 Matching the Incident against known errors, Problems, solutions, Planned Changes, or Knowledge databases.
 - 6.3.1.4 Documenting any potential solutions.

6.4 Resolution and Recovery

- 6.4.1 This activity shall involve resolving the Incident using a planned solution or a workaround and taking recovery actions.

6.5 Incident Closure

- 6.5.1 This activity shall involve:
 - 6.5.1.1 Updating Incident details.
 - 6.5.1.2 Contacting Requestor(s).
 - 6.5.1.3 Determining closure procedures.
 - 6.5.1.4 Closing the related Incident.
 - 6.5.1.5 Incidents maybe closed by the Support Team (Administrative Close) after 1 week and 3 unsuccessful Attempts to contact the requester.

6.6 Ownership, Monitoring, Tracking, and Communication

6.6.1 The Service Desk regularly monitors the status and progress of the Incident and keeps end-user informed of progress.

7. Service Desk

7.1 Service Desk Contact

7.1.1 Massar's IT Service Desk can be contacted via the

7.1.1.1 Massar home portal - <https://massarhome.awccs.ae/>

7.1.1.2 Telephone (02 507 5111)

7.1.1.3 Email: itsupport@massarsolutions.ae

7.2 Service Levels and Metrics

7.2.1 Incident Prioritization

The Massar IT department determines the priority of an Incident by cross-referencing and evaluating the impact on the business or service operations against the urgency by which a resolution or workaround is required.

7.2.2 Incident Impact and Urgency are defined as follows:

7.2.2.1 Business Impact Chart

Impact	Impact Scope
High	The ability to conduct business or services has stopped. Examples: Server, network, database, or application down.
Medium	Business or Services is moderately affected but can continue its operation via a short-term workaround or with incremental resources for a short period before the business is seriously degraded.
Low	Business or Services have not been interrupted but a problem is identified. A work-around solution is available in case the Customer experiences work interruptions. No loss of productivity is present.

7.2.2.2 Urgency Chart

Impact	Urgency Scope
High	Must be executed as soon as possible.
Medium	Must be executed before a particular deadline.
Low	Not required to be executed at a particular deadline or timeframe.

7.2.3 Impact/Urgency Chart

7.2.3.1 The chart below describes the priority classification level given to Incidents based on the Impact and Urgency described above.

7.2.3.2 For example, a High-Urgency Incident with impact labeled as High will be given a priority 1. A priority one (1) Incident calls for an immediate response time from the Service Desk and requires an 'immediate' resolution. Such an Incident if needed is immediately escalated to the 2nd level support and may require multiple resources to resolve.

		High	Med	Low
Impact	High	1	2	3
	Med	2	3	4 ← Priority
	Low	3	4	5

7.2.4 Incident Response Time

7.2.4.1 The Massar IT department has a defined response time when an Incident is recorded, classified, prioritized, and escalated to be resolved based on the Incident Management process outlined. The Incident Response Time chart contains the response and resolution time goals:

Priority	Response Time	Resolution Goal	First Escalation	Second Escalation	Third Escalation (Depends on third-party SLA)
1	<30 minutes	<2 business days	1 hour	3 hours	6 hours
2	<180 minutes	<5 business days	6 hours	12 hours	24 hours
3	<2 days	<10 business days	12 hours	24 hours	36 hours
4-5	<2 days	<30 business days	20 hours	48 hours	96 hours

8. Escalation Management

8.1 The service Desk shall receive all inbound service request calls, emails, and self-service incident tickets to escalate them to the proper support staff.

8.2 The escalation to the next level of support will occur per the Incident Response timeline or until the incident has been resolved.

9. Incident Management Process Map
